APPLE CARPLAY® | MOBILE ASSISTANT
Through Siri® Eyes Free

Apple CarPlay[1] provides a smarter, safer way to use your iPhone®[2] in the car: It takes many of the experiences you already enjoy on the iPhone itself and puts them right on your vehicle's audio multimedia display instead. You can get directions, make calls, send and receive messages, and listen to music, all in a way that allows you to stay focused on the road. Just connect your iPhone and go.
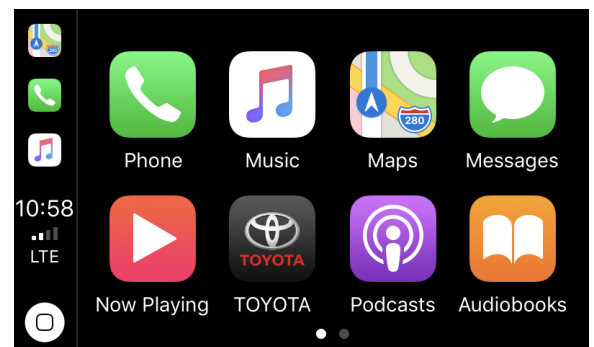

WHAT IS APPLE CARPLAY?

When set up and active, Apple CarPlay[1] takes over the vehicle's audio multimedia system, using the connected iPhone[2] to host a **dedicated operating system**. Because it runs on your iPhone, Apple CarPlay stays up to date on its own, receiving system updates whenever the iPhone does.

Apple CarPlay features a variety of default Apple[3] applications, like **Phone**, **Music**, **Apple Maps**, **iMessage**, and **Podcasts[4]**. Apple CarPlay supports other apps on your iPhone[2] – like your favorite audio, messaging, and voice apps. Apps developed by automobile manufacturers are also supported, so you can control more of your vehicle's features without ever leaving Apple CarPlay. You can personalize your experience by rearranging exactly how your apps appear in Apple CarPlay through settings on your iPhone.

Note: Search "CarPlay" on the App Store for a current list of available apps. Apps shown are the property of their respective owners. Apps and services subject to change. Subject to smartphone connectivity and capability.

Apple CarPlay's[1] apps are laid out in pages of eight (two rows of four icons, customizable via the phone). **The left edge of the Apple CarPlay home screen also features a quick menu of the three most recently used apps,** as well as clock, cellular/data signal strength indicators, and a home button.

Apple CarPlay[1] features Siri[5] voice control and is specially designed for driving scenarios. Apple CarPlay also works with your vehicle's controls – knobs, buttons or touchscreen. And the apps themselves have been reimagined for the vehicle, so you can use them while your eyes stay on the road.

HOW TO USE IT

Using Apple CarPlay[1] is as simple as plugging a compatible mobile device **(see App Store[6] for compability)** into the vehicle's USB port[7] and completing a few first–time user setup steps.

1 First see App Store for compability, an Apple Lightning Cable and that Apple CarPlay and Siri are both enabled. These should be on by default, but can be reactivated via the iPhone's **Settings** if necessary.

2 On your vehicle's audio multimedia system, ensure that Apple CarPlay is set to ON. To do this, press **Menu > Setup > General > Apple CarPlay > ON**. *(See Fig. A)*

Note: For first time users, when you plug the **Apple Lightning Cable** into your iPhone, you will receive a prompt asking "Allow CarPlay with Toyota while phone is locked?" Tap **Allow**. *(See Fig. B)*

Upon plugging your iPhone into the USB Media Port[4] via an approved **Apple Lightning Cable**, the audio multimedia system will display a prompt with three options: **Do Not Enable**, **Enable Once** and **Always Enable**. *(See Fig. C)*

Do Not Enable – This will disregard the Apple CarPlay request and the vehicle's audio multimedia system will function as normal.

Enable Once – This will activate Apple CarPlay for a single session only and will prompt the user each time the iPhone® is connected.

Always Enable – This will automatically activate Apple CarPlay for any future sessions and will no longer prompt the user.

⚠️ **Note:** This prompt will only display if the Apple CarPlay setting is **OFF** when an iPhone® is plugged in via USB.

3 To use Apple CarPlay, simply select the **MENU** button on the audio multimedia display and then **tap on the Apple CarPlay icon** on your vehicle's multimedia system. Once enabled, Entune® 3.0 App Suite[8] will be **disabled** while Apple CarPlay is in use.

To back out of the Apple CarPlay interface and use your native Entune™ 3.0 system, tap the **Toyota App Icon** or press the **HOME** button. Apple CarPlay will still run in the background, including functions like phone and music streaming. It can be returned to at any time by using the steps described earlier. To end an Apple CarPlay session completely, simply unplug your iPhone. And that's all there is to using Apple CarPlay on Toyota vehicles. *(See Fig. D)*

Note: The Push to Talk button **will only work when Apple CarPlay is active** for the following MY20 models:

4Runner
C–HR
Camry
Corolla Hatchback
Highlander
RAV4
Sequoia
Tacoma
Tundra

MOBILE ASSISTANT
## THROUGH SIRI EYES FREE

WHAT IT IS

Siri Eyes Free[5] lets Toyota owners use Apple's voice recognition[9] system through the vehicle's steering wheel controls and in-car microphone. Responses from Siri are then played back from the vehicle's audio system.

This hands-free[10] feature helps promote safe driving while staying connected. Using audible voice commands, the driver can focus on the road ahead while interacting with their iPhone[2] – all without letting go of the wheel.
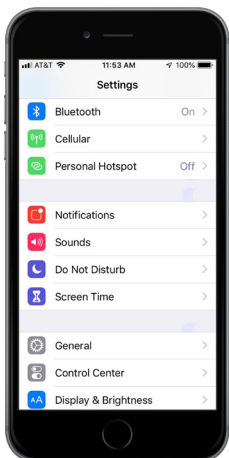

Although Siri Eyes Free **doesn't require Apple CarPlay**, it **does require a compatible iPhone** to use in any Toyota vehicle.

**Note: Siri Eyes Free is available on many MY16 and new Toyota models.**

HOW TO USE IT

1 First ensure that Siri is enabled on a compatible iPhone.

2 Enable *Bluetooth®* on iPhone.

**3** Pair iPhone to the vehicle's audio multimedia system via *Bluetooth*[11].

4 Press and hold the talk switch on the steering wheel for 3 seconds.

5 Wait for the beep and then speak your command.

WHAT TYPES OF COMMANDS ARE SUPPORTED WHILE USING SIRI?

If you want to		Say
	Hear new texts	Read my text messages
	Send a text	Send text message <desired message> to <desired name in Contacts>
	Hear recent emails	Read my email
	Send email	Send email to <desired name in Contacts>
	Hear next event	What's my next meeting?
	Setup new calendar invite	Create calendar event <name of event> for <day/date> at <time>
	Get directions to a destination	Get directions to <name of destination OR full address – house number, street name, city name, state name>
	Play a song	Play <song in Music library>
	Play an Apple Radio station	Play radio station <name of Apple Radio station>
	Play a podcast	Play podcast <name of podcast on iPhone>
	Hear weather	What's the weather like in <city name>?

Note: Siri Eyes Free requires internet access and uses mobile data.

THINGS TO KNOW

The available features and functions may vary based on the iOS version installed on the connected device.

- While a phone call is active, the Mobile Assistant cannot be used.
- If using the navigation feature of the cellular phone, ensure the active audio source is *Bluetooth* audio or iPod®[2] in order to hear turn by turn direction prompts.
- Wait for the listening beeps before using the Mobile Assistant.
- The Mobile Assistant may not recognize commands in the following situations:
  - Spoken **too quickly.**
  - Spoken at a **low or high volume.**
  - The **roof or windows are open.**
  - **Passengers are talking** while the Mobile Assistant is being used.
  - The **fan speed** of the air conditioning system is set at high.
  - The **air conditioning vents** are turned toward the microphone.

DISCLOSURES

1. Apps, prices and services vary by phone carrier and are subject to change at any time without notice. Subject to smartphone connectivity and capability. Data charges may apply. See www.toyota.com/audio-multimedia for details. **2.** iPod and iPhone are registered trademarks of Apple Inc. All rights reserved. **3.** Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. **4.** Apps and services subject to change. **5.** Always drive safely, obey traffic laws and focus on the road while driving. Siri is available on select iPhone/iPad models and requires Internet access. Siri is not available in all languages or all areas and features vary by area. Some Siri functionality and commands are not accessible in the vehicle. Data charges may apply. See Apple.com and phone carrier for details. Siri is a registered trademark of Apple Inc. **6.** App Store is a service mark of Apple Inc. **7.** May not be compatible with all mobile phones, MP3/WMA players and like models. **8.** Toyota and third party apps/services may vary by phone/carrier and are subject to change at any time without notice; functionality depends on many factors. Select apps use large amounts of data; you are responsible for charges. See www.toyota.com/audiomultimedia for details. To learn about Toyota Audio Multimedia data collection, use, sharing and retention, please visit www.toyota.com/privacyvts/. Always drive safely and obey traffic laws. **9.** Advanced Voice Recognition capabilities vary by head unit. **10.** Concentrating on the road should always be your first priority while driving. Do not use the hands-free phone system if it will distract you. **11.** The Bluetooth word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Toyota is under license. A compatible Bluetooth enabled phone must first be paired. Phone performance depends on software, coverage and carrier. (Published June 2019)
